

# Privacy Policy

Welcome to the privacy policy for DeepVoyager, an AI chatbot utilizing searches from the Omega search engine as its dataset. This policy outlines how we manage, collect, use, and safeguard your information. We highly recommend that you carefully read and understand the following information.

## Information Collection and Use

DeepVoyager does not directly collect or store any user-specific data. Instead, it accesses and utilizes search data from the Omega search engine. This search data is anonymized and does not contain personally identifiable information.

## Data Processing

The data processed by DeepVoyager consists solely of anonymized search queries gathered from the Omega search engine. No additional data is collected, stored, or processed by DeepVoyager beyond the scope of these search queries.

## Storage and Security

Due to limited storage capacities, DeepVoyager does not retain any search data. All search queries are accessed in real-time from the Omega search engine and are not stored locally. Therefore, we do not have any data storage mechanisms or security measures in place for user-specific information.

## Information Sharing

As DeepVoyager does not collect or store any user-specific data, there is no sharing of such information with third parties. Any data accessed from

the Omega search engine is used solely for the purpose of providing conversational responses within the chatbot.

### **Cookies and Tracking**

DeepVoyager does not use cookies or any tracking mechanisms to monitor user activity. As a result, there are no tracking technologies employed by the chatbot to gather or store user-specific information.

### **Updates to the Privacy Policy**

Any future updates or modifications to this privacy policy will be communicated through the DeepVoyager platform. However, as there is no data collection or storage by the chatbot, changes in this policy might not significantly affect user privacy or data handling.

### **User Rights and Choices**

As DeepVoyager does not collect or retain any user-specific data, there are no specific user rights or choices related to data privacy concerning the chatbot's operations.

### **Legal Compliance**

DeepVoyager operates in compliance with applicable laws and regulations regarding data privacy. However, as no user-specific data is collected or stored, legal compliance primarily pertains to accessing and utilizing search data from the Omega search engine.
